

AS1040

The Apache Model AS1040 Sprayer

Comfort. Speed. Accuracy. Efficiency. That's exactly what you get from every Apache Sprayer. They're built to handle the toughest field conditions with a higher standard of comfort and performance. Because all we do is build sprayers, we're 100% focused on building the best sprayers in the industry.

With a 1,000-gallon capacity tank, the Apache AS1040 Sprayer is the most popular sized model in the lineup. It features a mechanical drive that makes it simple to operate and nimble enough to work in field conditions competitive sprayers can't. When the days are long, its 35 mph road speed will get you to the next field (or home) faster.

Lightweight

The AS1040 is engineered lightweight at just 20,000 lbs. That means better fuel economy, reduced compaction and a lower price.

Perfect Size

This model offers a turning radius of 18 ft and a wheel base of 15 ft — perfect for tight-fit areas.

Affordable

Enjoy the lower cost of ownership and better resale value of an Apache. Apache Sprayers retain an average of 72 percent of their value after five years and is why the 1000 Series sprayers have won the Highest Retained Value Award from *EquipmentWatch*™ three years running.

Unique Features of the AS1040

Tank Capacity
1,000 gallons

Transmission
ZF Powershift, 6-speed with lock-up torque converter

Engine
Cummins Tier 4F 225 hp (rated)

Top Road Speed
35 mph

Weight
20,000 lbs (approximate dry weight)

Crop Clearance
JCB 42" with planetary final drive
50" with 18" drop box all-gear final drives (optional)

FIVE-YEAR POWERTRAIN WARRANTY

Equipment Technologies warrants every new Apache Sprayer to be free from defects in materials and workmanship for a period of five years or 2,000 hours, whichever occurs first. The first two years of warranty includes bumper-to-bumper coverage (some exclusions apply), with the following three years covering parts only.

All model year 2019 Apache Sprayers are available with optional ISOBUS-ready wiring in lieu of factory installed field computers. Refer to your specific precision agriculture product documentation for compatibility information. Equipment Technologies factory installs all field computers using CAN-BUS wiring and protocols.

Equipment Technologies reserves the right to make changes in engineering, design and specifications; add improvements; or discontinue manufacturing at any time without notice or obligation. All brand or product names are or may be trademarks of, and are used to identify products and services of, their respective owners or its subsidiaries and divisions, in the U.S. and/or other countries. All specifications are subject to change without notice.
