Regenerative Agriculture-The Power of the Plant!

Ray Archuleta

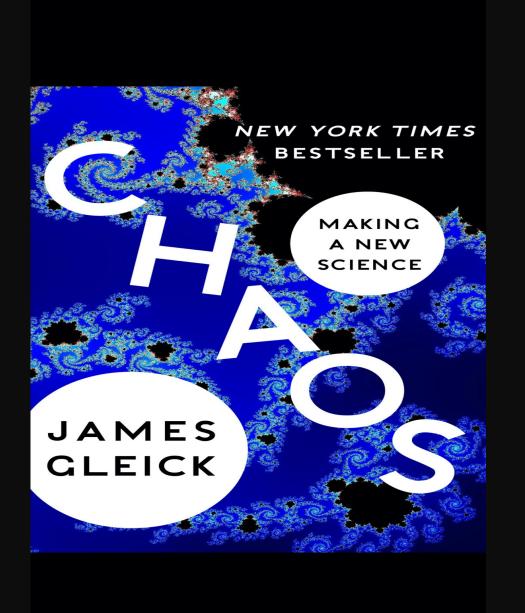

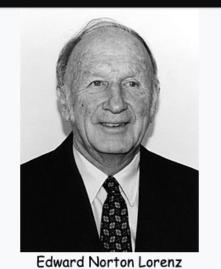

My Soil Health Journey 2007-2023: Millions Of Miles-

Critical Concepts to Understand:

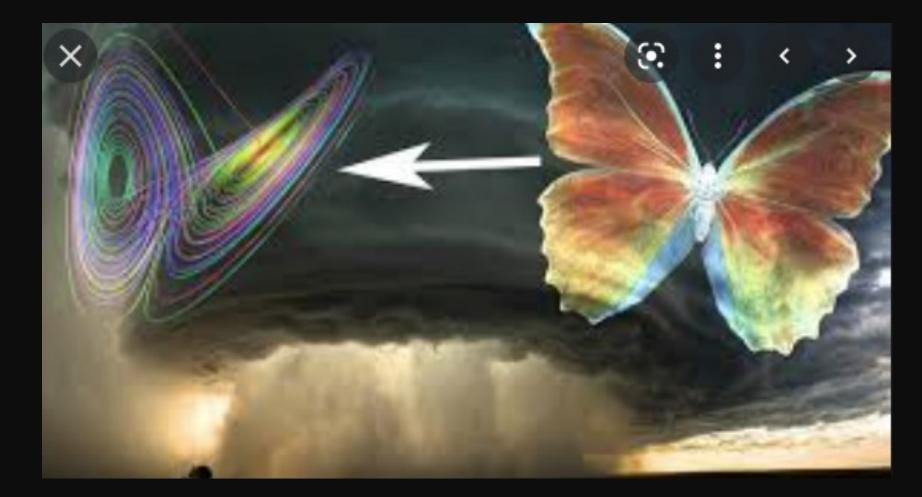

- 1. All is ONE! SEE THE WHOLE-Relationship and connectedness...."Butterfly effect"
- 2. The Soil is Alive-focus on the Plant!
- 3. Understand the goal: Mimic Nature's Design Principles and Patterns. ("Biomimicry")
- 4. Regeneration Starts with the Mind and Heart.

For <u>want of a nail</u> the <u>shoe</u> was lost. For want of a shoe the horse was lost. For want of a horse the rider was lost. For want of a rider the message was lost. For want of a message the battle was lost. For want of a battle the kingdom was lost. And all for the <u>want of a horseshoe nail.</u>

Aggregates: Microbes and Plants make biotic glues to fuse- Sand, Silt, and Clay to create little marbles (aggregates) which make pore-space in the soil. This increases infiltration and water retention.

German philosopher Frederick Nietzsche once said, "He who has a why can endure any how".

Only when you know your 'why' will you find the courage to take the risks needed to get ahead, stay motivated when the chips are down, and move your life onto an entirely new, more challenging, and more rewarding trajectory. 3.
