

# America's No-Tillers, WE SALUTE YOU ...

For your sharing of your knowledge, your perseverance and commitment to and advancing a practice for farmers worldwide.

We at Syngenta and all our legacy companies are proud of our role in no-till's storied history.

## 60 Years

Supplied the burndown products necessary for Harry M. Young, Jr. to succeed with his first commercially successful no-till field.

## 50 Years

Provided financial support by advertising unique product solutions in the premier edition of No-Till Farmer.

## 30 Years

Sponsored the inaugural National No-Tillage Conference 30 years ago to promote knowledge transfer among farmers – and sponsored every conference since then, too.

## **We look forward to another 50 years of innovations. Together.**

For 50 years, No-Till Farmer has set itself apart with a unique style and leadership in the industry. Congratulations. Here's to another 50.

At Syngenta, we're setting ourselves apart, too. Our goal is to be the leading provider of innovation solutions to growers. We develop new, higher-yielding seeds and better ways to protect crops from insects, weeds and disease. Farmers can get more from existing farmland and meet the challenge of the future to grow more from less.

Innovation in Agriculture • Protecting Crops • Seed • Sustainability
